Uses 2 AA batteries, included.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Robert Johnson 4.0 out of 5 stars Amazon is awesome, one click and two days later It arrived. I

unboxed the contents, put the batteries in, attached the clamp, and I was up and running. It is this capability of being able to clamp to round objects that leaves it a little unstable when clamping to square objects but still within acceptable limits. The clamp can be articulated in virtually any direction. There are multiple slots on the level to attach the clamp to, although since its self leveling and an X shape I have yet to figure out why. I originally ordered this to aid in screw placement on a white metal roof project but discovered very quickly the level would not work very well at all in full sunlight. A big plus is that the selfleveling function can be turned off and the cross hairs left on. This is very handy for projecting perpendicular lines on a wall, floor, or ceiling. Perfect for tile work. You can even rotate the cross hairs, e.g. for a diagonal pattern. Other pluses are the threaded mounting hole for use on a camera tripod, and the articulated arm which permits projecting lines in any position or angle. Bottom line if I lost this one, would I buy another Yes.

Well designed, easy to use, well priced. The problem is the laser light is not strong. With any light be in sunlight or lamplight, I can barely see the laser unless its within 34 feet of what Im pointing it at. For the price in comparison to other products of the same nature, I would still recommend this as Im sure you can make it work, but improving the visibility of the actual laser would make this a 5star product. I wanted something to help with hanging pictures and artwork in the house and this is perfect. Instead of using levels and tapes, I can get out my adjustable height ladder and set the laser at the height I need and just start hanging. Max range in normal light is about 20, it starts to get dim after that. I havent used it outside yet, but it probably is not bright enough under most conditions. However, its a great indoor small project self leveling laser. A solid, cheap, AUTOLEVELING laser line. Overall pretty good. I really wanted a green rotary laser, but its just too expensive. Bright enough for indoor use. Perfectly suited for tile work, cabinets, picture hanging, etc. First set of batteries have lasted 8ish hours so far and still going strong. Cons Kinda touchy when you are trying to match a mark on the wall across the room. You have to twist it to the right position, let it level out, then keep adjusting till you hit the point. Trial and error. But once its set it stays in position well. Using to finish our basement and the self leveling and distance it throws a laser is great. My only complaint is that the unit needs to be fairly far back to cast a laser on the ceiling to run the distance needed. It seems about 34ft in front of the unit will not display the beam on the ceiling. It is not horrible but something to keep in mind for tight spots. Makes getting plum walls easy. The mount is nice too plan to use it for setting my outlet boxes hight for given walls. I bought this and had everything perfect in a matter of minutes.

People that review say it is not bright enough, I had no problem with that but my project was inside. I used the item mounted on a tripod and it worked well. The clamp on mount that it comes with looks pretty flimsy and probably wouldnt have worked so well. Lines are bright and not too thick. The mounting bracket is a bit flimsy and hard to grip, but better than not having one. I would say its good for weekend warriors. The unit does have a standard tripod screw mount on the bottom, it took me a fair searching to figure this out before buying. A couple negatives. As others have noted while the included clamp while has good range of motion does have a tendency to slip as its almost entirely plastic; Id personally recommend grabbing a cheap camera tripod should you be using it in an area where that would work for you. In addition in locked mode it will still flash to let you know it is off level, which is also somewhat annoying. Sorry, we failed to record your vote. Please try again This one is a good tool and does what its supposed to do, but I slightly preferred the controls on the Bosch GLL 2 SelfLeveling CrossLine Laser, which is the other one I bought. In both cases and as other reviewers have pointed out, youll probably want to use a tripod instead of the contraption that comes with the level. All in all, a good purchase for the money. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Can not see laser very well in sunlight, but that is not what this is intended for and does not claim to be able to use outdoors in the sun. Sorry, we failed to record your vote. Please try again The included mounting system doesnt hold as well as I would like, so I mounted it on my own tripod which improves the stability. Sorry, we

failed to record your vote.

Stay up to date with Roland news, artists, promotions, events, and more. Provides an overview of key features, functions and operational tips. The Roland Worldwide Social Network keeps you connected to the latest products, exciting events, and much more. Its near universal USB support means it works seamlessly with Mac and PC computers, and even supports iPads, for the ultimate in portable music production and performance. And you shouldn't have to sacrifice sound quality to have an affordable interface that you can take with you. It's made of durable metal, and a lot went into its compact, lownoise design. With all the places Rubix22 can go, you'll appreciate its extensive shielding and ground lifts, making sure you get good clean audio just about anywhere. They sound clean and transparent with plenty of headroom for capturing all the impact and detail of whatever you're recording. And the flexible combo jacks mean you can easily connect a wide variety of sources without the need for adapters or special cables. It has low latency class compliant drivers for Mac and PC, so its simple to get up and running with smooth, reliable audio performance. And it also supports iPad giving you an extremely compact system for onlocation recording, onthego production, or live performance. It even includes Ableton Live Lite, powerful studio production and live performance software that works perfectly with Rubix22, right out of the box. This is because there are too many other variables that may influence the processing environment, including differences in motherboard design and the particular combination of other devices involved. You can also contact our Product Support department by phone or email.
